EDUCATION

LICET

B.E Computer and Science

2015 - 2019

7.33 CGPA

SKILLS

FRONTEND TECHNOLOGIES

React JS */ Redux /* ***JavaScript*** */*
TypeScript */ Angular / Next JS / CSS*
Gatsby JS / Tailwind CSS / HTML

BACKEND TECHNOLOGIES

Node JS */ Express JS /* ***Python*** */*
Django / REST / GraphQL

DATABASES

MongoDB */ MySQL / Redis /*
PostgreSQL

TESTING TOOLS

Playwright / Jest

CI/CD TOOLS

Docker / Github Actions

OTHER TOOLS

Webpack / Babel / ***Auth0*** */* ***Firebase***

CERTIFICATIONS

AWS Certified Cloud Practitioner

ARUL VALAN ANTO S

FULL STACK DEVELOPER WITH 4 YEARS OF EXPERIENCE

SUMMARY

Versatile and highly skilled Full Stack Developer with over **four years** of hands-on experience developing robust and scalable web applications. Demonstrated front-end and back-end development expertise, utilizing various programming languages, such as **JavaScript, Python, and TypeScript,** and its frameworks and tools.

WORK EXPERIENCE

Software Engineer

Augment (Remote), Coimbatore, India   Feb 2022 - Present

- Implemented the **OAuth 2.0** authorization protocol using Auth0, which enabled third-party applications such as Outlook plugin to securely access resources on behalf of their users.
- Codeveloped an **Outlook plugin**, which simplified the process of sharing decks in AirDeck from seven steps to just two, resulting in increased user engagement.
- Worked with multiple proofs-of-concept (**POC**), obtained client approval, and Implemented them for actual use.
- Developed a **remote sensing app** to offer information about endangered species and soil surveys for land analysis.

Web Developer

Coding Space India, Chennai, India   Jan 2020 - Jan 2022

- Created **automation scripts** to quickly design a new section, reducing the time needed for development by **15%**.
- **Assisted co-developers** in solving their issues and challenges during the development process.
- Initiated and guided the development of the **internal design system**, cutting down UI discrepancy issues by **50%**.

PROJECTS

- **AirDeck** - A **document narration platform** partnering with enterprise sales, CS onboarding, and marketing teams to deliver personalized content at scale. [https://airdeck.co/]
- **FrameWise** - An **AI platform** designed to gather information from uploaded videos and provide **detailed insights and analysis** for each frame. [https://framewiise.web.app/]
- **LandGenius** - A **remote sensing app** offering swift land analysis information, benefiting builders and urban planners.
- **Boilers** - A **scaffolding CLI** for initial React and Node setup, designed to automate common tasks and **save development time**.[https://www.npmjs.com/package/boilers]
- **The Crawler Man** - A Platform offers a comprehensive collection of pre-defined APIs explicitly designed for scraping, allowing users to effortlessly extract data from various websites without any hassle.
